CERAMIC FUSE COMPATIBILITY

We have found that some equipment with no inrush protection will destroy Ceramic body fuses.

It is recommended that a potential fuse customer first try a stock ceramic body fuse before replacing with Hi Fi Tuning Fuse.

IMPORTANT NOTICE: A blown fuse is NOT the sign of a defective item – they are designed to do just that. We suggest that each customer test any fuse purchased for continuity, before installing in their gear, to ensure it is intact upon arrival. Also, given the cost of audio-grade fuses, it may be prudent to slightly uprate the Amperage, to ensure that these expensive fuses do not blow prematurely. Remember, a blown fuse is not covered by any manufacturer's warranty.

World's First Supreme³-Diamond Fuses & Holder, of course 100 % Handmade in Germany.

The advertisement features a black background with gold text and graphics. On the left, a stylized 'HiFi-Tuning' logo is accompanied by the quote 'THE BEST OR NOTHING (Gottlieb Daimler)'. Below this is a circuit diagram of a fuse holder. In the center is a black plastic fuse holder with a gold-colored fuse inserted. To the right of the holder is a black box labeled 'HiFi-Tuning Supreme3' with a circuit diagram and a 'Diamond' logo. Further right are five individual fuses, each with a black body and gold-colored end caps. At the bottom right, the website 'www.hifi-tuning.com' and email 'order@hifi-tuning.com' are listed.
